

# Contents

Integrating Disparate Knowledge Representations within 4D/RCS / 1
<i>J. Albus, C. Schlenoff, R. Madhavan, S. Balakirsky, and T. Barbera</i>
“Pulling it All Together” via Psychometric AI / 9
<i>Selmer Bringsjord and Bettina Schimanski</i>
Principles of Collaborative Coordination: An Agenda for Furthering Interactive Computational Intelligence / 17
<i>Derek Brock</i>
A Cognitively-Oriented Architecture Confronts Hard Problems / 22
<i>Susan L. Epstein</i>
Companion Cognitive Systems: A Step towards Human-Level AI / 30
<i>Kenneth D. Forbus and Thomas R. Hinrichs</i>
The Common Ground of Constraint Satisfaction / 35
<i>Eugene C. Freuder</i>
Engines of the Brain: The Computational “Instruction Set” of Perception and Cognition / 36
<i>R. Granger, S. Petrovic, A. Felch, J. Kerr, M. Johnson, C. Wuerth, and J. Benvenuto</i>
Reinforcement Learning as a Context for Integrating AI Research / 44
<i>Bill Hibbard</i>
Comparative Analysis of Frameworks for Knowledge-Intensive Intelligent Agents / 47
<i>Randolph M. Jones and Robert E. Wray</i>
Novamente: An Integrative Architecture for General Intelligence / 54
<i>Moshe Looks, Ben Goertzel, and Cassio Pennachin</i>
Viewing Vision-Language Integration as a Double-Grounding Case / 62
<i>Katerina Pastra</i>
Towards Virtual Humans / 70
<i>William Swartout, Jonathan Gratch, Randall Hill, Eduard Hovy, Stacy Marsella, Jeff Rickel, and David Traum</i>
Self Trained Artificial Neural Network / 78
<i>Vikramaditya Reddy.J.</i>
Toward a Unified Artificial Intelligence / 83
<i>Pei Wang</i>
