

# Contents

Comparing Different Optimality — Theoretic Learning Algorithms: The Case of Metrical Phonology / 1	<i>Diana Apoussidou and Paul Boersma</i>
Meaning to Learn: Bootstrapping Semantics to Infer Syntax / 8	<i>Tom Armstrong and Tim Oates</i>
The Significance of Errors to Parametric Models of Language Acquisition / 15	<i>Paula Buttery and Ted Briscoe</i>
Grammatical Inference and the Argument from the Poverty of the Stimulus / 21	<i>Alexander Clark</i>
A Cross Disciplinary Look at Statistics and Grounding in Human Lexical Learning / 28	<i>Harlan D. Harris and James S. Magnuson</i>
Corpus-Based Induction of Syntactic Structure: Models of Constituency and Dependency / 32	<i>Dan Klein and Christopher D. Manning</i>
Learning Semantic Parsers: An Important but Under-Studied Problem / 39	<i>Raymond J. Mooney</i>
When Push Comes to Shove: A Study of the Relation between Interaction Dynamics and Verb Use / 45	<i>Clayton T. Morrison, Erin N. Cannon, and Paul R. Cohen</i>
Inducing Constraint-Based Grammars from a Small Semantic Treebank / 49	<i>Smaranda Muresan, Tudor Muresan, and Judith L. Klavans</i>
On Grounding the Content of Language / 57	<i>Deb Roy</i>
Unsupervised Context Sensitive Language Acquisition from Large, Untagged Corpora / 61	<i>Zach Solan, Eytan Ruppín, David Horn, and Shimon Edelman</i>
Semi-Supervised Semantic Role Labeling / 65	<i>Cynthia A. Thompson</i>
Does English Need its Pronouns? Simulating the Effect of Pro-drop on SVO Languages / 69	<i>Ezra Van Everbroeck, Maria Polinsky, and Garrison W. Cottrell</i>
