

# Contents

Preface / vii

Social Performance Framework / 1  
*Hannes Vilhjalmsson, Stacy C. Marsella*

Whiteboards: Scheduling Blackboards  
for Semantic Routing of Messages & Streams / 8  
*Kristinn R. Thórisson, Thor List, Christopher Pennock, and John DiPirro*

Two Approaches to a Plug-and-Play Vision Architecture —  
CAVIAR and Psyclone / 16  
*Thor List, José Bins, Robert B. Fisher, David Tweed,  
and Kristinn R. Thórisson*

NetP: A Network API for Building Heterogeneous  
Modular Intelligent Systems / 24  
*Kai-Yuh Hsiao, Peter Gorniak, and Deb Roy*

Grounded Situation Models for Robots: Bridging Language,  
Perception, and Action / 32  
*Nikolaos Mavridis and Deb Roy*

Multimodal Conversation between a Humanoid  
Robot and Multiple Persons / 40  
*Maren Bennewitz, Felix Faber, Dominik Joho, Michael Schreiber,  
and Sven Behnke*

MARCO: A Modular Architecture for Following Route Instructions / 48  
*Matt MacMahon*

Commonsense Psychology and the Functional Requirements  
of Cognitive Models / 56  
*Andrew S. Gordon*

Modular Assembly of Intelligence by Mathematical Abstractions / 63  
*Zippora Arzi-Gonczarowski*

Designing a Self-Aware Neuromorphic Hybrid / 71  
*Alexei V. Samsonovich and Kenneth A. De Jong*

Toward Helpful Robot Teammates: A Simulation-Theoretic Approach  
for Inferring Mental States of Others / 79  
*Jesse Gray and Cynthia Breazeal*

Commonsense Reasoning about Task Instructions / 86  
*Rakesh Gupta and Ken Henny*

Synthetic Social Construction for Autonomous Characters / 92  
*Eric Baumer and Bill Tomlinson*
