AAAI maintains compilation copyright for this technical report and retains the right of first refusal to any publication (including electronic distribution) arising from this AAAI event. Please do not make any inquiries or arrangements for hardcopy or electronic publication of all or part of the papers contained in these working notes without first exploring the options available through AAAI Press and *AI Magazine* (concurrent submission to AAAI and another publisher is not acceptable). A signed release of this right by AAAI is required before publication by a third party.

Distribution of this technical report by any means including electronic (including, but not limited to the posting of the papers on any Website) without permission is prohibited.

ISBN 978-1-57735-283-9 WS-06-01

Manufactured in the United States of America

Organizing Committee

Prashant Doshi, (cochair) University of Georgia
Richard Goodwin, (cochair) IBM T. J. Watson Research Center
Amit Sheth, (cochair), University of Georgia

Program Committee

Rama Akkiraju, IBM T. J. Watson Research Center, US
Nirmit Desai, North Carolina State University, US
John Domingue, Knowledge Media Institute, UK
Michael Huhns, University of South Carolina, US
Vipul Kashyap, Partners Healthcare, US
Joseph Kopena, Drexel University, US
Juhnyoung Lee, IBM T. J. Watson Research Center, US
David Martin, SRI International, US
E. Michael Maximilien, IBM Almaden Research Center, US
Sheila McIlraith, University of Toronto, Canada
Muninder Singh, North Carolina State University, US
Rainer Unland, University of Duisberg-Essen, Germany
Kunal Verma, University of Georgia, US

This AAAI-06 Workshop was held July 16, 2006,
in Boston, Massachusetts USA

Contents

- SEMAPLAN: Combining Planning with Semantic
Matching to Achieve Web Service Composition / 1
*Rama Akkiraju, Biplav Srivastava, Anca-Andreea Ivan, Richard Goodwin,
and Tanveer Syeda-Mahmood*
- The Logic for Decidable Reasoning about Services / 9
Yilan Gu and Mikhail Soutchanski
- Adaptive Web Processes Using Value of Change Computations / 19
John Harney and Prashant Doshi
- Two-Phased Web Service Discovery / 26
Ruben Lara
- Interaction Design in Agent-Based Service-Oriented
Computing Systems / 36
José Ghislain Quenum, Fuyuki Ishikawa, and Shinichi Honiden
- Modeling Web Service Composition using Symbolic Transition Systems / 44
Jyotishman Pathak, Samik Basu, and Vasant Honavar
- A Mixed Initiative Framework for Semantic Web Service
Discovery and Composition / 52
Jinghai Rao, Dimitar Dimitrov, Paul Hofmann, and Norman Sadeh
- Plan Analysis for Enabling Service Oriented Computing / 60
Biplav Srivastava
- Optimal Adaptation in Web Processes with
Coordination Constraints / 65
*Kunal Verma, Prashant Doshi, Karthik Gomadam,
John Miller, and Amit Sheth*
- Composing Nested Web Processes Using Hierarchical
Semi-Markov Decision Processes / 75
Haibo Zhao and Prashant Doshi
